

DETECTING THE PARKINSON'S DETECTION USING MACHINE LEARNING

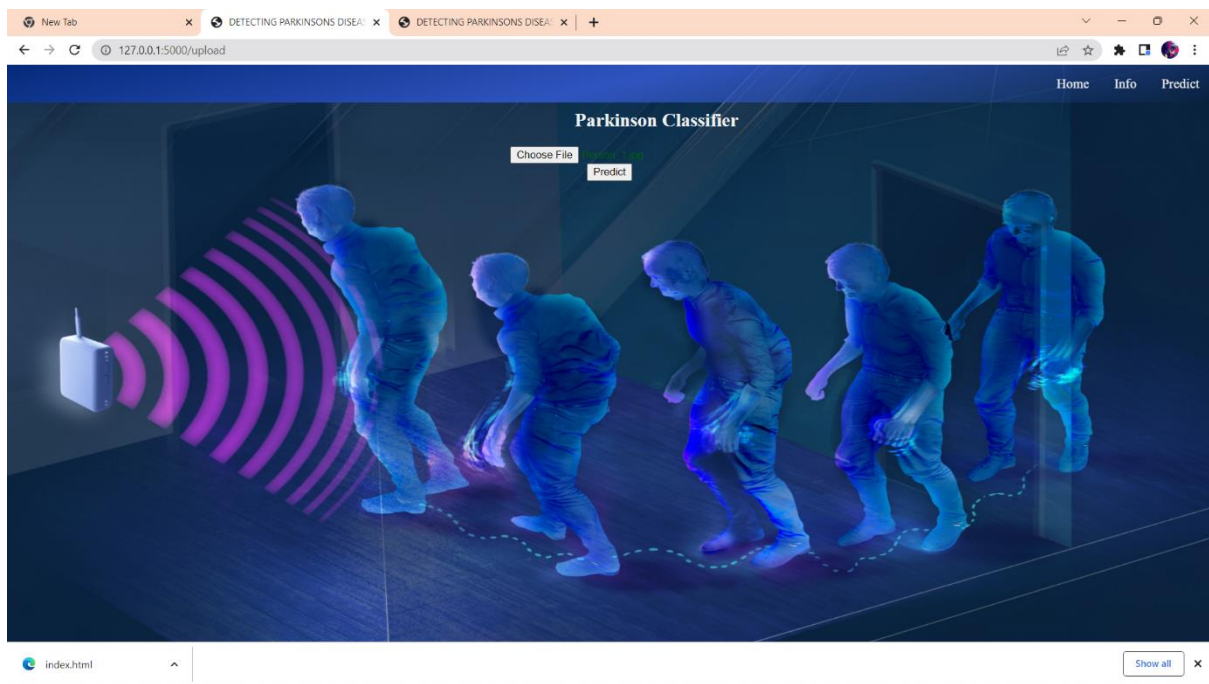

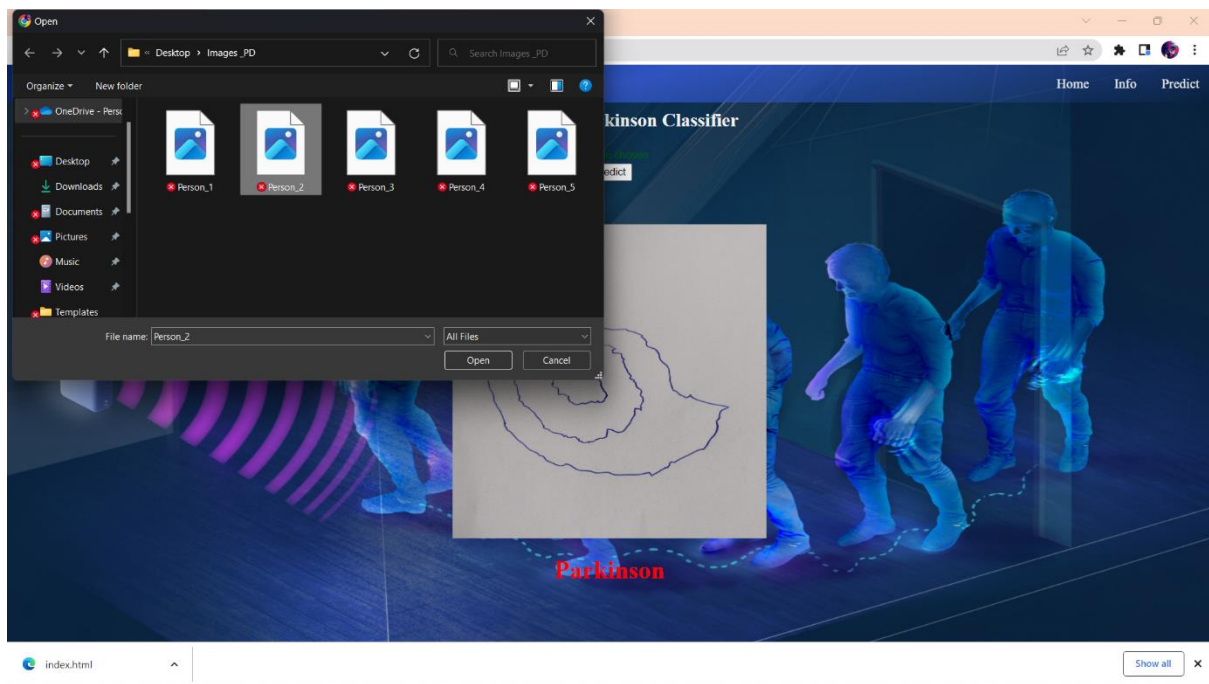

RUN THE APP:

Open anaconda prompt from the start menu.

- Navigate to the folder where your app.py resides.
- Now type “**python app.py**” command.
- It will show the local host where your app is running (on <http://localhost:8000/>)
- Copy that localhost URL and open that URL in the browser. It navigates to view the web page.
- Click on the **predict button** from the top right corner.

Click on choose and select the image and click on the “**Predict!**” button

Finally, the output is displayed on **predict.html**
